Civic Helicopters - California
ATP, CFII, AGI -17,000+ PIC Helicopter

“I’m a big fan of the FLYIT Professional Helicopter Simulator. Civic Helicopters proudly operates one and gladly endorses this product!”

“I’m proud to say that I was involved in reviewing the original FLYIT helicopter simulator designed by FLYIT in 1999. In fact, at Civic Helicopters we operate the very first model ever developed by FLYIT, which has since been upgraded to the latest specifications. This simulator meets all of our training needs.

As a former production test pilot, I’ll admit that I was skeptical about a helicopter simulator using PC technology and sold for \$100,000. But after testing and evaluating this machine, I decided to buy one ***EVEN BEFORE IT HAD FAA APPROVAL.***

FLYIT Simulators has not let me down. This product just keeps getting better!”
